DevOps and Backend: *Laravel, Django, CI/CD, Git, Docker, AWS*

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jul 2025 – Present | Kabul, Afghanistan

Bright Vision Technologies / shopino24 is an online shopping platform

- Improved Shopino24 Web App performance by implementing Laravel caching (Redis, query optimization) and enhancing UX/UI with responsive design, lazy loading, and optimized assets.
- Implemented CI/CD pipelines for automated testing, deployment, and production release to ensure reliability and faster delivery.
- Led the development of Shopino24 mobile app using React Native and REST API integration.
- Implemented Context Provider for centralized state management and integrated JWT with secure storage for user authentication.
- URL: [Shopino24.com](https://shopino24.com) 

Full Stack Developer

May 2025 – Present | Kabul, Afghanistan

Brand Construction Company (USA based Time Zone)

- Developing Servicjee (all-in-one) service platform in the USA using Next.js stack. Implemented microservices architecture with containerization (Docker, Kubernetes), clear task division, and API gateway for scalable service integration.
- Implemented Google Maps API to enable service area selection and expansion by miles.
- Established CI/CD pipelines with automated testing, version control, and zero-downtime deployments for production reliability.
- URL: [Servicjee.com](https://servicjee.com) 

Full Stack Developer

Jan 2024 – Mar 2025 | Kabul, Afghanistan

iMMAP Inc. / USA based INGos working in different countries

- Contributed to the development of ReportHub v2, a humanitarian data management platform used in Afghanistan, Nigeria, Somalia, and Iraq, supporting its mission to manage and streamline critical data.
- Built a complex dashboard for data visualization and filtering using Python libraries such as Pandas, Matplotlib, and Plotly, enabling result-driven insights and data-driven decision-making.
- Contributed to developing features for importing Excel data and exporting to PDF, XLSX, CSV, and JSON using Python libraries such as OpenPyXL.
- URL: ReportHub is currently offline due to a suspension of funding from USAID. [Learn more...](#) 

Junior Full Stack Developer

Jul 2023 – Jan 2024 | Kabul, Afghanistan

iMMAP Inc. / USA based INGos working in different countries

- Collected feedback from stakeholders on their experience using ReportHub v1 during training sessions and contributed to developing ReportHub v2 using Python/Django to improve functionality and user experience.
- Implemented role-based access controls for SuperAdmin, ClusterAdmin, OrgAdmin, and Users, and integrated automated email notifications for project registrations based on user roles.
- Contributed to the development and optimization of UI/UX design, improving usability, responsiveness, and overall user experience.

Angular UI Developer

May 2019 – Dec 2019 | Pune, India

Assasa Technologies

- Contributed to the development of the Milkman project UI using Angular 9 (Typescript), focusing on responsive design and user-friendly interfaces.
- Collaborate with backend developers to integrate APIs and ensure smooth data flow.
- Ensured cross-browser compatibility and responsive design across devices by implementing CORS policies and best practices.

EDUCATION

Bachelor of Business Administration-Computer

Jul 2017 – Apr 2020 | Pune, India

Application(BBA-CA)

Savitribai Phule Pune University

LANGUAGES

English: *Fluent* **Persian:** *Native* **Hindi:** *Basic*

AWARDS

First Class with Extention(A+ Grade)

2020

Savitribai Phule Pune University

Achieved first-class honors with 82.22% in final-year university examinations, demonstrating excellence in both theoretical knowledge and practical project development.
